

PATHOLOGY REQUEST FORM

STEP 1 - PRACTITIONER

1. Enter your Name and Customer Code
2. Mark the quantity required for prescribed test/s on inside of this form.

PLEASE COMPLETE BOTH FIELDS

PRACTITIONER NAME

CUSTOMER CODE

STEP 2 - PATIENT

Option 1 - Website Ordering

1. Go to www.researchnutrition.com.au
2. Click Referred Patient > Order A Test Kit
 - Use this form to know what test to select by matching the test code.
 - FAQs and helpful videos can be found on the [PATIENT RESOURCES](#) section of our website.

Option 2 - Email/Post/Fax Ordering

Send this completed form by fax, post or email
support@researchnutrition.com.au

EMAIL/POST/FAX ORDERING ONLY - PLEASE PRINT CLEARLY, USE CAPITAL LETTERS & COMPLETE EVERY FIELD.

BY DEFAULT PARCELS WILL BE LEAVE AT ADDRESS. IF YOU DO NOT WANT THE PARCEL LEFT, PLEASE SPECIFY BY TICKING BELOW:

NON-MEDICARE

DO NOT LEAVE PARCEL IF NOT HOME - If not present during delivery I will pick up parcel from post office (*signature will be required*)

(Test price + \$22) = \$

ADDITIONAL \$22 POSTAGE & HANDLING FEE REQUIRED IF ORDERING ANY SIBO TEST WITH ANOTHER LAB TEST

TOTAL
(Test prices + \$22 Standard P&H + \$22 SIBO P&H) = \$

SENDING OF KITS

The kit will be dispatched by courier within 1 business day of receiving your order.

Estimated delivery times are as follows:

Brisbane/Gold Coast: 1-2 business days | **Sydney & Melbourne:** 2-3 business days

Other areas in QLD, NSW, and VIC: 3-4 business days | **SA, NT:** 3-5 business days | **WA:** 4-5 business days

TIP: It is advised to provide an address where someone is there during business hours, to ensure the parcel arrives safely.

TERMS AND CONDITIONS

- Practitioner is responsible for marking on the form which test/s is being prescribed.
- Full collection instructions are found inside the test kit.
Please note under no circumstances can Research Nutrition answer questions regarding a patient's healthcare or why you have been prescribed the test/s.
- Test results are sent to your practitioner only. Patients are unable to contact Research Nutrition to obtain their results. Please ensure you contact your practitioner for any such enquires while you conduct your test and to follow up with the results.
- Request for a refund on an un-submitted test must be made no more than 30 days after the test kit order. The handling fee will not be refunded.

If Research Nutrition has to re-send a test kit as a result of a patient not following the collection instructions correctly, a \$50 recollection fee may be charged* (*SIBO tests incur an \$87 recollection fee, including P&H)

NOTE - If sending this form back via email or fax, you will need to include the FRONT page with the patient details as well as the page/s with the selected test/s.

FREQUENTLY ASKED QUESTIONS

ORDERING A KIT

How do I order my test kit?

It is the practitioner's duty to mark which test(s) are prescribed to you on the Pathology Request Form. Please see STEP 2 - PATIENT on front page of this form for ordering options.

When does my credit card get charged?

Full test price (including handling fee) is charged to your credit card on the same day we receive your test kit order. The kit is then generally dispatched within 1 business day. Please allow 1-5 working days for delivery.

What if I change my mind after ordering the kit?

Request for a refund on an un-submitted test must be made no more than 30 days after the test kit order. **The \$22 handling fee will not be refunded.**

COLLECTION

Will certain foods, supplements or medications interfere with the test results?

Some foods, supplements and medications can influence the test results. It is up to your healthcare practitioner to discuss with you what foods, supplements or medications they want you to continue or discontinue. Never discontinue medication without speaking with your healthcare practitioner.

What if I am not feeling my normal self (i.e. have the flu, no appetite, etc.), should I still perform the test?

It is best to contact your practitioner – they may like you to wait until you are feeling back to your normal state of health before conducting the test.

What if I don't feel comfortable doing the test?

It may help to perform the test when you are in the privacy of your home, on a day where you don't have much else on. Give yourself plenty of time to prepare for the test and read the instructions to plan step-by-step. Remember, your practitioner has recommended that you do the test in order to help you reach a better state of health. If you are feeling too overwhelmed and / or uncomfortable, we suggest that you contact your practitioner to discuss other options.

SHIPPING

What day should I send the sample?

The instructions found inside the test kit will tell you to either send by courier or general post (depending on what test you are completing). You will either find a pre-paid courier bag, or a return postal envelope inside the test kit for returning your sample.

Some tests are time-sensitive and instructions need to be followed precisely.

How should my sample be stored while I am waiting for courier pick up?

Please refer to the Collection Instructions found inside your test kit.

IMPORTANT NOTE

- * Please avoid having samples arrive at Research Nutrition on a Friday.
- * Research Nutrition is closed weekends, public holidays, and 4 weeks over Christmas (mid Dec – mid Jan). Please do not send samples during this time.

RESULTS

How long will it take before I see my results?

Please be aware that if you are sending your sample by post, this may take up to 1 week to arrive at Research Nutrition. (You can contact your local post office for more specific time frames).

Test results take between two and three weeks from the date your sample is received by Research Nutrition.

Who receives the results?

Research Nutrition forwards the results to your practitioner. We cannot send results directly to the patient. Only your practitioner can explain your results to you.

Why can't you send a copy of the results straight back to me?

This is for a similar reason as to why you need to book an appointment with your GP to discuss general pathology test results. It is important that your practitioner discuss the results with you; therefore, we cannot give test results directly to patients.

RESEARCH NUTRITION CANNOT, UNDER ANY CIRCUMSTANCES, OFFER HEALTH ADVICE TO PATIENTS. SHOULD YOU REQUIRE FURTHER SUPPORT, PLEASE CONTACT YOUR HEALTHCARE PRACTITIONER.
